Mathematical Biosciences

an international journal

Volume 47, 1979

OSCAR M. SORARRAIN, RAFAEL BOGGIO R.(La Plata, Argentina), AND EWALD A. FAVRET (Castelar, Argentina)
A Mathematical Model for the Evolution of a Host-Pathogen System 1

J. EISENFELD (Arlington and Dallas, TX)
On Identifiability of Impulse-Response in Compartmental Systems 15

WILLIAM KILMER AND THOMAS PROBERT (Amherst, MA)
Depletion Models for Ecosystems with Continuously Delayed Resource Renewals 35

SURESH H. MOOLGAVKAR (Philadelphia, PA) AND DAVID J. VENZON (Princeton, NJ)
Two-Event Models for Carcinogenesis: Incidence Curves for Childhood and Adult Tumors 55

STEPHEN J. MERRILL (Milwaukee, WI)
A Mathematical Model of Tumor Growth and Cytotoxic Blocking Activity 79

CHARLES J. MODE AND GARY PICKENS (Philadelphia, PA)
An Analysis of Postpartum Contraceptive Strategies— Policies for Preventive Medicine 91

J. R. BREARLEY AND A. C. SOUDACK (Vancouver, B.C., Canada)
The Application of Equivalent Linearization and Correction Factor Techniques to Selected Predator-Prey Equations 115

BOOK REVIEW 139

S. B. Hsu (Salt Lake City, UT) and S. P. Hubbell (Iowa City, IA)
Two Predators Competing for Two Prey Species:
An Analysis of MacArthur's Model 143

C. Cobelli, A. Lepschy, and G. Romanin Jacur (Padova, Italy)
Identifiability Results on
Some Constrained Compartmental Systems 173

Joan L. Aron (Princeton, NJ)
Harvesting a Protected Population in an Uncertain Environment 197

Morton E. Gurtin and Daniel S. Levine (Pittsburgh, PA)
On Predator-Prey Interactions
with Predation Dependent on Age of Prey 207

Barry Bunow and George H. Weiss (Bethesda, MD)
How Chaotic is Chaos?
Chaotic and Other "Noisy" Dynamics in the Frequency Domain 221

Carolyne M. Hart and Robert J. Mulholland (Stillwater, OK)
Structural Identifiability of Compartmental Systems
Based upon Measurements of Accumulated Tracer in Closed Pools 239

Robert Schoen (Urbana, IL)
Calculating Increment-Decrement Life Tables
by Estimating Mean Durations at Transfer from Observed Rates 255

D. L. DeAngelis and J. S. Mattice (Oak Ridge, TN)
Implications of a Partial-Differential-Equation Cohort Model 271

STATEMENT OF OWNERSHIP, MANAGEMENT, AND CIRCULATION (Act of August 12, 1970: Section 3685, Title 39. United States Code). 1. Title of publication: Mathematical Biosciences. A. Publication No.: 0025–5564. 2. Date of filing, 9/28/79. 3. Frequency of issue, ten times per year. A. No. of issues published annually: 10. B. Annual subscription price: $220.00. 4. Location of known office of publication: 52 Vanderbilt Ave., New York NY 10017. 5. Location of the headquarters or general business offices of the publishers: same as in #4. 6. Names and complete addresses of publisher, editor, and managing editor: Publisher, Elsevier North-Holland, Inc., 52 Vanderbilt Ave., New York, NY 10017. Editor, John A. Jacquez, 490 Huntington Dr., Ann Arbor, MI 48104. Managing editor, none. 7. Owner: Elsevier North-Holland, Inc., address same as in #4. 8. Known bondholders, mortgages, and other security holders owning or holding 1% or more of total amount of bonds, mortgages, or securities: None. 9. (Not applicable). 10. Extent and nature of circulation: A. Total no. copies printed (Net press run): Average no. copies each issue during preceding 12 months, 1150; No. copies of single issue published nearest to filing date: 1150. B. Paid circulation: 1. Sales through dealers and carriers, street vendors and counter sales: None. 2. Mail subscriptions: Average no. copies each issue during preceding 12 months, 850; No. copies of single issue published nearest to filing date, 850. C. Total paid circulation: Average no. copies each issue during preceding 12 months, 850; No. copies of single issue published nearest to filing date, 850. D. Free distribution by mail, carrier or other means, samples, complimentary, and other free copies: Average no. copies each issue during preceding 12 months, 50; No. copies of single issue published nearest to filing date, 50. E. Total distribution: Average no. of copies each issue during preceding 12 months, 900; No. copies of single issue published nearest to filing date, 900. F. Copies not distributed: 1. office use, left over, unaccounted, spoiled after printing: Average no. copies each issue during preceding 12 months, 250; No. copies of single issue published nearest to filing date, 250. 2. Returns from news agents: Average no. copies each issue during preceding 12 months, None; No. copies of single issue published nearest to filing date, None. G. Total: Average no. copies each issue during preceding 12 months, 1150; No. Copies of single issue published nearest to filing date, 1150. 11. I certify that the statements made by me above are correct and complete.
